

Notice

Coastal Georgia Regional Water Planning Council and Savannah-Upper Ogeechee Regional Water Planning Council Joint Meeting

Announcement Date: August 3, 2012

To All Interested Parties

The Army Corps of Engineers (Savannah District) and its co-sponsors (the Georgia Environmental Protection Division, the South Carolina Department of Natural Resources and The Nature Conservancy) are developing a performance management plan which will ensure for continuation of work (known as Phase 2) under the Savannah River Basin Comprehensive Study. Phase 2 of the Comprehensive Study will concentrate on drought related flows, and will 1) evaluate the Corps' existing Drought Contingency Plan (DCP) by modeling various selected flow release scenarios from the Hartwell-Russell-Thurmond reservoir system and assessing their effects on lake and downstream uses, and 2) determine if revisions to the Corps' existing DCP are needed. The study area is within the watersheds of both the Coastal Georgia and Savannah-Upper Ogeechee Regional Water Planning Councils. During the meeting, the Corps of Engineers will present the details of the flow alternatives currently proposed for study. Comment is welcome on the proposed flow alternatives both at the meeting and in written format (to be received by the Georgia Environmental Protection Division no later than August 27th, 2012).

The meeting will be held at the following date, time, and location:

1:00 PM – 3:00 PM, Tuesday, August 14, 2012
Savannah Rapids Pavilion
3300 Evans to Locks Rd.
Martinez, GA 30907
